

Sella

**Marine collagen peptides
for a healthy, glowing
and elastic skin.**

Includes Zinc | Hyaluronic Acid | 13 Vitamins

[Brochure](#)

Collagen is vital for our skin and it is a well known fact that we produce about 1% less of it each year after our twenties.

To rebuild upon the lack of collagen our bodies start producing we must consume the correct food and maintain great nutrition. Supplements can provide a little help with that, giving our bodies the boost they need to keep our skin firm, shiny, and healthy.

Our Marine Collagen

However, conventional collagen products typically contain low dosages of collagen and few ingredients.

That's why Sella Collagen contains 12 grams of the highest, most bioavailable source of fish collagen available on the market. Furthermore, it also contains natural vitamins and minerals for those who prefer a supplement that provides all the essential nutrients the body needs for a healthier skin.

FISH COLLAGEN

is absorbed up to **1.5 times** more efficiently into the body which means it has superior bioavailability over bovine or porcine types. This is due to its smaller particle size compared to other types of collagen.

About Sella

Mission

Provide both men and women with high-quality building blocks to enjoy life. Support your health, fitness and natural beauty with Sella Collagen to (literally) feel good about yourself.

Our Added Value

Sella generally contains much more ingredients & higher dosages than other collagen products. This makes Sella Collagen more effective & relatively cheaper than other collagen providers.

The Product

Sella Collagen is a nutritional supplement for the skin, hair, bones and nails. It consists of 16 top quality ingredients, carefully selected using the latest scientific insights.

Intended Effects

GLOWING SKIN

Reduces wrinkles, increases skin elasticity

BONES & JOINT

Builds strong bones, aids in muscle repair

HAIRS & NAILS

Revitalizes hair, promotes stronger, longer nails

GUT HEALTH

Heals leaky gut, curbs cravings

Sella marine collagen also contains natural vitamins and minerals to improve your overall health- and skin in their own unique ways.

Marine Collagen Peptides

The building block for a beautiful skin, flexible connective tissues and strong bones. The advantage of hydrolyzed collagen is that the collagen has been broken down into smaller units, making it more easily digestible.

Hyaluronic Acid

Key to keep your skin moisturised and radiant. It also helps to prevent the development of wrinkles, and fills in already present wrinkles to reduce their appearance. Finally, it is an antioxidant and helps to keep the skin look healthy.

Zinc

A steady supply of zinc is needed to promote the healthy growth of nails. Additionally, Zinc plays an important role in hair tissue growth and repair.

Vitamin B1

Thiamine is good for red, irritated, acne-prone or dry skin. It also improves the appearance of fine lines and wrinkles.

Vitamin B2

B2 can help improve skin tone, make skin more radiant and balance natural oils, making these great vitamins for dry skin or acne.

Vitamin B3

Vitamin B3 supports your skin's natural defenses. It helps protect against environmental stressors and improves the look and feel of mature, dry and sensitive skin.

Vitamin B5

B5 is a great option for keeping skin feeling hydrated and supple. Pantothenic acid also balances skin and calms the appearance of redness and inflammation.

Vitamin B6

This B vitamin helps diminish the effects of hormonal imbalance, which can lead to acne breakouts.

Vitamin B7

Biotin gives skin a naturally revitalized appearance, making it well-suited to dull and aging skin. A welcome extra: A high dose of biotin is commonly used in products for stronger, lusher and healthier hair.

Vitamin B8

Helps improve the clinical condition of skin.

Vitamin B9

B9 lends skin a purified feeling. Besides that, Folic Acid also improves the growth of hair.

Vitamin B12

B12 boosts the radiance of dull and mature skin. This B vitamin also helps to diminish the look of dark spots and uneven skin tone.

Vitamin A

Vitamine A helps prevent sun damage by interrupting the process that breaks down collagen.

Vitamin C

This vitamin helps the twisted web of protein hold its shape. It's also a powerful antioxidant, protecting you from free radicals and possibly lowering your chance of skin cancer.

Vitamin D3

Healthy vitamin D levels can help prevent skin from prematurely aging.

Vitamin E

Vitamin E is an antioxidant. This means it can absorb the energy from UV light, which damages skin and leads to wrinkles, sagging, and skin cancer.
